SUMMARY

Software Developer with 5+ years of experience building scalable, high-performance web applications using JavaScript (ES6+), React.js, and Next.js. Experienced in AI-powered platforms, payment integrations, authentication systems, reusable component architectures, and desktop applications. Strong expertise in frontend optimization, responsive UI systems, API integration, cache handling, CI/CD pipelines, Python, RAG, and Machine Learning. Experienced in building AI-driven applications and integrating intelligent workflows with modern web technologies.

SKILLS

JavaScript (ES6+), HTML5, CSS3, SCSS/SASS, React.js, Next.js, Node.js, Python, RAG, Machine Learning (ML), Electron, PixiJS, Zustand, Tailwind CSS, Bootstrap, Stripe Integration, REST API Integration, Authentication & Authorization, Client-Server Architecture, Async/Await, DOM Manipulation, Cache Handling, Performance Optimization, Lighthouse Optimization, Cross-Browser Compatibility, Jenkins, CI/CD Pipelines

EXPERIENCE

Full Stack Developer — Synkcode

Oct 2024 – Present

- Developed scalable and high-performance web applications using React.js and Next.js.
- Built AI-powered chatbot interfaces improving user engagement and interaction experience.
- Implemented secure Stripe payment gateway integration and optimized payment workflows.
- Managed frontend state efficiently using Zustand for scalable application architecture.
- Developed reusable and dynamic component systems using modern React practices.
- Built reusable JavaScript components and frontend modules following modern ES6+ standards.
- Designed and implemented authentication and authorization flows for secure user access management.
- Integrated REST APIs and Node.js backend services for efficient client-server communication and data handling.
- Improved application performance and Lighthouse scores using useMemo, React.memo, lazy loading, cache handling, and rendering optimization.
- Worked with Jenkins and CI/CD pipelines to support automated build and deployment workflows.
- Ensured responsive behavior, accessibility, and cross-browser compatibility across applications.
- Collaborated with product managers and backend teams to deliver scalable production-ready features.
- Developed blockchain-based browser extension interfaces with optimized frontend architecture.

Associate - I — TTEC

Apr 2024 – Oct 2024

- Worked as a Python Developer, developing Python-based workflow solutions to support data-driven business processes and improve operational efficiency.
- Collaborated with teams to improve application usability, workflows, and process automation.
- Analyzed business requirements and translated them into effective technical solutions.

Frontend Developer — Deep Print

Jan 2022 – Mar 2024

- Developed scalable e-commerce platform using React.js.
- Integrated payment workflows and optimized checkout experiences.
- Built reusable responsive UI components.
- Integrated APIs for product and order management.
- **Live Project:** deepprint.in

PROJECTS

Meeting Transcript AI

GitHub

- Built a full-stack AI-powered meeting transcript application using React.js, Node.js, and Express.js to generate concise summaries, key discussion points, decisions, and actionable tasks.
- Integrated AI capabilities to analyze meeting content and generate structured, actionable insights.

Portfolio

Live Project

- Developed a personalized portfolio using HTML, CSS, and JavaScript with responsive design optimized across devices to showcase technical skills and projects.

E-Commerce Website

GitHub

- Engineered a dynamic e-commerce application using React.js, JavaScript, HTML, and CSS with intuitive navigation and integrated payment workflows.

EDUCATION

Bachelor of Engineering (B.E.)

2014 – 2018

Oriental College of Technology, Bhopal

Minor in Data Science

2025 – 2026

IIT Guwahati (Daksh Gurukul)

CERTIFICATIONS

- **Advanced CSS & SASS** — Udemy Certificate
- **Introduction to HTML, CSS and JavaScript** — Coursera Certificate
- **Namaste React** — NamasteDev Certificate
